

Editorial Board

An international journal of physiology produced jointly by the International Union of Physiological Sciences and the American Physiological Society

Editor-in-Chief Walter Boron, Cleveland, OH
Associate Editors Michael Caplan, New Haven, CT
Ulrich Pohl, Munich, Germany
Special Advisor Gerhard Giebisch, New Haven, CT

Consulting Editors

Richard Aldrich, Austin, TX
David Clapham, Boston, MA
Graham Dockray, Liverpool, UK
Sten Grillner, Stockholm, Sweden
Susan Hamilton, Houston, TX
Donald Hilgemann, Dallas, TX
Reinhard Jahn, Göttingen, Germany
Baruch Kanner, Jerusalem, Israel
Julie Kauer, Providence, RI
Amira Klip, Toronto, Canada
Litsa Kranias, Cincinnati, OH
Jennifer Lippincott-Schwartz, Bethesda, MD
José Lopez-Barneo, Seville, Spain
Heini Murer, Zurich, Switzerland
Tullio Pozzan, Padua, Italy
William Sessa, New Haven, CT
Michael Welsh, Iowa City, IA

Editorial Coordinator

Charleen M. Bertolini

APS Publications Office

M. Reich, Director of Publications
S. Boyer, Journal Copy Editor

Art Direction, Penumbra Design, Inc.

Patrick Lane, Design
Kelly Paraliss Keenan, Art Development/Editing and Illustration

IUPS/APS Joint Managing Board

K. E. Barrett, Chair
Akimichi Kaneko
Ewa Szczepanska-Sadowska
Malcolm Gordon, IUPS Treasurer

Physiology (ISSN 1548-9213; ESN 1548-9221) is published bimonthly (one volume per year) by the International Union of Physiological Sciences and the American Physiological Society. Subscription Price (U.S. dollars): Institutional print only, \$255 U.S., \$260 Canada and Mexico, \$265 elsewhere; institutional print and online, \$275 U.S., \$280 Canada and Mexico, \$285 elsewhere; institutional online only, \$220; nonmember individual print only, \$175 U.S., \$180 Canada and Mexico, \$185 elsewhere; nonmember individual print and online, \$195 U.S., \$200 Canada and Mexico, \$205 elsewhere; nonmember individual online only, \$145; members of IUPS-affiliated societies print and online, \$75.00, postpaid. Subscriptions are accepted on a calendar year basis only. Single Copies, Back Issues: when available \$50.00 each, postpaid. Copyright © 2007 by the International Union of Physiological Sciences and the American Physiological Society. Printed in the United States of America. The code at the bottom of the first page of an article indicates copyright owner's consent that copies may be made beyond that permitted by sections 107 and 108 of the U.S. Copyright Law—unless the copies are for general distribution, advertising, creating new works, or resale—provided the per-copy fee is paid through the Copyright Clearance Center, Inc., 222 Rosewood Dr., Danvers, MA 01923. 1548-9213/07 \$8.00. Change of Address: The journal must be advised of a change of address at least 6 weeks before date of issue, with both the subscriber's new and old addresses given. Undelivered copies resulting from an address change will not be replaced. Editorial Inquiries: Walter F. Boron, Editor-in-Chief, *Physiology*, c/o Charleen Bertolini, Department of Cellular and Molecular Physiology, School of Medicine, 333 Cedar St., P. O. Box 208026, New Haven, CT 06520-8026. Subscription and Advertising Inquiries: *Physiology*, The American Physiological Society, 9650 Rockville Pike, Bethesda, MD 20814-3991.

Highlights From the Literature 299

REVIEWS

Phospho-regulation of β -Catenin Adhesion and Signaling Functions 303

Rebecca Leadem Daugherty and Cara J. Gottardi

β -Catenin function is determined by its binding partners, and the relative strength of these interactions is strongly influenced by phosphorylation.

Renin Release 310

Frank Schweda, Ulla Friis, Charlotte Wagner, Ole Skott, and Armin Kurtz

The review covers the processing and exocytosis of renin and its regulation at the cellular level.

Extracellular Calcium and cAMP: Second Messengers as "Third Messengers"? 320

Aldebaran M. Hofer and Konstantinos Lefkimmatis

Can fluctuations in extracellular calcium and cAMP be considered as "signals" in their own right?

Targeting Altered Calcium Physiology in the Heart: Translational Approaches to Excitation, Contraction, and Transcription 328

Tim Seidler, Gerd Hasenfuss, and Lars S. Maier

Calcium is essential for excitation contraction coupling and excitation transcription coupling. Both disturbed Ca handling and altered Ca-dependent signalling are hallmarks of heart failure and are the subject of current research.

No Potassium, No Acid: K^+ Channels and Gastric Acid Secretion 335

Dirk Heitzmann and Richard Warth

In gastric parietal cells, recently identified luminal KCNE2/KCNQ1 K^+ channels are a pivotal determinant of acid secretion.

Mechanisms of Human Arrhythmia Syndromes: Abnormal Cardiac Macromolecular Interactions 342

Peter J. Mohler and Xander H. T. Wehrens

Recent studies demonstrate that inherited defects in ion channel regulatory and targeting proteins can cause cardiac arrhythmia syndromes.

On the cover: Electron micrograph of a mouse afferent arteriole showing juxtaglomerular epithelioid cells with renin granules. See Schweda, Friis, Wagner, Skott, and Kurtz, p. 310.
