

Editorial Board

An international journal of physiology produced jointly by the International Union of Physiological Sciences and the American Physiological Society

Editor-in-Chief Walter Boron, Cleveland, OH
Associate Editors Michael Caplan, New Haven, CT
Ulrich Pohl, Munich, Germany
Special Advisor Gerhard Giebisch, New Haven, CT

Consulting Editors
Richard Aldrich, Austin, TX
David Clapham, Boston, MA
Graham Dockray, Liverpool, UK
Sten Grillner, Stockholm, Sweden
Susan Hamilton, Houston, TX
Donald Hilgemann, Dallas, TX
Reinhard Jahn, Göttingen, Germany
Baruch Kanner, Jerusalem, Israel
Julie Kauer, Providence, RI
Amira Klip, Toronto, Canada
Litsa Kranias, Cincinnati, OH
Jennifer Lippincott-Schwartz, Bethesda, MD
José Lopez-Barneo, Seville, Spain
Heini Murer, Zurich, Switzerland
Tullio Pozzan, Padua, Italy
William Sessa, New Haven, CT
Michael Welsh, Iowa City, IA

Editorial Coordinator
Charleen M. Bertolini

APS Publications Office
M. Reich, Director of Publications
S. Boyer, Journal Copy Editor

Art Direction, Penumbra Design, Inc.
Patrick Lane, Design
Kelly Paralis Keenan, Art Development/Editing and Illustration

IUPS/APS Joint Managing Board
K. E. Barrett, Chair
Akimichi Kaneko
Ewa Szczepanska-Sadowska
Malcolm Gordon, IUPS Treasurer

Physiology (ISSN 1548-9213; EISSN 1548-9221) is published bimonthly (one volume per year) by the International Union of Physiological Sciences and the American Physiological Society. Subscription Price (U.S. dollars): Institutional print only, \$270 U.S., \$285 Canada and Mexico, \$285 elsewhere; institutional print and online, \$290 U.S., \$305 Canada and Mexico, \$305 elsewhere; institutional online only, \$230; nonmember individual print only, \$185 U.S., \$200 Canada and Mexico, \$200 elsewhere; nonmember individual print and online, \$205 U.S., \$220 Canada and Mexico, \$220 elsewhere; nonmember individual online only, \$150; members of IUPS-affiliated societies print and online, \$80.00, postpaid. Subscriptions are accepted on a calendar year basis only. Single Copies, Back Issues: when available \$25 each subscriber, \$50 each nonsubscriber, postpaid. Copyright © 2008 by the International Union of Physiological Sciences and the American Physiological Society. Printed in the United States of America. The code at the bottom of the first page of an article indicates copyright owner's consent that copies may be made beyond that permitted by sections 107 and 108 of the U.S. Copyright Law—unless the copies are for general distribution, advertising, creating new works, or resale—provided the per-copy fee is paid through the Copyright Clearance Center, Inc., 222 Rosewood Dr., Danvers, MA 01923. 1548-9213/07 \$8.00. Change of Address: The journal must be advised of a change of address at least 6 weeks before date of issue, with both the subscriber's new and old addresses given. Undelivered copies resulting from an address change will not be replaced. Editorial Inquiries: Walter F. Boron, Editor-in-Chief, *Physiology*, c/o Charleen Bertolini, Editorial Coordinator, *Physiology*, Case Western Reserve University, Physiology & Biophysics, 130 Mill Pond Way, Hendersonville, NC 28791. Subscription and Advertising Inquiries: *Physiology*, The American Physiological Society, 9650 Rockville Pike, Bethesda, MD 20814-3991.

PHYSIOLOGY

Volume 22, February 2008

Editorial 2
How to Measure Science in *Physiology*

Highlights From the Literature 3

REVIEWS

Toward Biologically Targeted Therapy of Calcium Cycling Defects in Heart Failure 6
Yasuhiro Ikeda, Masahiko Hoshijima, and Kenneth R. Chien
Dysregulation of subcellular phosphoregulation in calcium cycling regulators in heart failure.

β-Arrestins: Multifunctional Cellular Mediators 17
Liza Barki-Harrington and Howard A. Rockman
This review explores the many functions of β-arrestins, with an emphasis on their recently identified role as regulators of receptor signaling.

A New Trick for an Old Dogma: ENaC Proteins as Mechanotransducers in Vascular Smooth Muscle 23
Heather A. Drummond, Samira C. Grifoni, and Nikki L. Jernigan
This review will address how the *C. elegans* mechanotransducer model can be used to model pressure detection in mammalian VSMCs and provide a new perspective to pressure detection in VSMCs.

Calcitropic and Magnesiotropic TRP Channels 32
Joost G. J. Hoenderop and René J. M. Bindels
Recent insights in the regulation of TRPV5/6 and TRPM6 channels have refined our physiological and molecular understanding of transepithelial Ca²⁺ and Mg²⁺ transport.

Physiology of Nucleoside Transporters: Back to the Future. . . 41
Jennifer B. Rose and Imogen R. Coe
In this review, various aspects of the physiology of NTs in mammalian systems are discussed, with particular note of tissues and cells where there has been little recent research.

Potassium Channel Phosphorylation in Excitable Cells: Providing Dynamic Functional Variability to a Diverse Family of Ion Channels 49
Kang-Sik Park, Jae-Won Yang, Edward Seikel, and James S. Trimmer
Potassium channel phosphorylation, its impact on channel function, and its analysis using classical candidate site approaches and mass spectrometric-based techniques are reviewed.

On the cover: Tissues in which nucleoside transporters have been described and some physiological roles elucidated. See Rose and Coe, p. 41.
