

An international journal of physiology produced jointly by the International Union of Physiological Sciences and the American Physiological Society

Editor-in-Chief Walter Boron, Cleveland, OH

Associate Editors Michael Caplan, New Haven, CT
Ulrich Pohl, Munich, Germany

Special Advisor, Emeritus Gerhard Giebisch, New Haven, CT

Consulting Editors
Hsiao Chang Chan, Hong Kong, China
Graham Dockray, Liverpool, UK
Sten Grillner, Stockholm, Sweden
Donald Hilgemann, Dallas, TX
Reinhard Jahn, Göttingen, Germany
Baruch Kanner, Jerusalem, Israel
Julie Kauer, Providence, RI
Amira Klip, Toronto, Canada
Litsa Kranias, Cincinnati, OH
Richard S. Lewis, Stanford, CA
Jennifer Lippincott-Schwartz, Bethesda, MD
José Lopez-Barneo, Seville, Spain
Heini Murer, Zurich, Switzerland
Tullio Pozzan, Padua, Italy
Jenny Stow, Queensland, Australia
Michael Welsh, Iowa City, IA

Editorial Coordinator
Charleen M. Bertolini

APS Publications Office
R. Scheman, Director of Publications
S. Boyer, Journal Copy Editor

Art Direction, Penumbra Design, Inc.
Kelly Paraliss Keenan, Art Development/Editing and Illustration

IUPS/APS Joint Managing Board
K. E. Barrett, Chair
Akimichi Kaneko
Ewa Szczepanska-Sadowska
Malcolm Gordon, IUPS Treasurer

Physiology (ISSN 1548-9213; ESN 1548-9221) is published bimonthly (one volume per year) by the International Union of Physiological Sciences and the American Physiological Society. Subscription Price (U.S. dollars): Institutional print only, \$275 U.S., \$285 Canada and Mexico, \$285 elsewhere; institutional print and online, \$295 U.S., \$305 Canada and Mexico, \$305 elsewhere; institutional online only, \$235; nonmember individual print only, \$190 U.S., \$200 Canada and Mexico, \$200 elsewhere; nonmember individual print and online, \$210 U.S., \$220 Canada and Mexico, \$220 elsewhere; nonmember individual online only, \$155; members of IUPS-affiliated societies print and online, \$80.00, postpaid. Subscriptions are accepted on a calendar year basis only. Single Copies, Back Issues: when available \$25 each subscriber, \$50 each nonsubscriber, postpaid. Copyright © 2009 by the International Union of Physiological Sciences and the American Physiological Society. Printed in the United States of America. The code at the bottom of the first page of an article indicates copyright owner's consent that copies may be made beyond that permitted by sections 107 and 108 of the U.S. Copyright Law—unless the copies are for general distribution, advertising, creating new works, or resale—provided the per-copy fee is paid through the Copyright Clearance Center, Inc., 222 Rosewood Dr., Danvers, MA 01923. 1548-9213/09 \$8.00. Change of Address: The journal must be advised of a change of address at least 6 weeks before date of issue, with both the subscriber's new and old addresses given. Undelivered copies resulting from an address change will not be replaced. Editorial Inquiries: Walter F. Boron, Editor-in-Chief, *Physiology*, c/o Charleen Bertolini, Editorial Coordinator, *Physiology*, Case Western Reserve University, Physiology & Biophysics, 130 Mill Pond Way, Hendersonville, NC 28791. Subscription and Advertising Inquiries: *Physiology*, The American Physiological Society, 9650 Rockville Pike, Bethesda, MD 20814-3991.

Disclaimer: The statements and opinions contained in the articles of *Physiology* are solely those of the individual authors and contributors and not of the American Physiological Society. The appearance of advertisements in the journal is not a warranty, endorsement, or approval of the products or their safety. REVIEWS

Preeclampsia: The Role of Angiogenic Factors in Its Pathogenesis	147
Alice Wang, Sarosh Rana, and S. Ananth Karumanchi	
This review focuses on the role of angiogenic factors in the pathogenesis of preeclampsia, one of the most common medical complications of pregnancy.	
CNS Regulation of Glucose Homeostasis	159
Carol K. L. Lam, Madhu Chari, and Tony K. T. Lam	
Review highlighting the role of the hypothalamus in the regulation of glucose homeostasis and discussing the cellular and molecular mechanisms by which this neural pathway is orchestrated.	
GABA's Control of Stem and Cancer Cell Proliferation in Adult Neural and Peripheral Niches	171
Stephanie Z. Young and Angélique Bordey	
This review discusses GABA's presence as a near-universal signal that may be altered in tumor cells resulting in modified mitotic activity.	
Hypertonic Stress in the Kidney: A Necessary Evil	186
Min Seong Kwon, Sun Woo Lim, and H. Moo Kwon	
Ambient tonicity is a powerful signal for gene expression and differentiation in addition to its osmotic action.	
Unexpected Roles of the Na-K-ATPase and Other Ion Transporters in Cell Junctions and Tubulogenesis	192
Thomas Krupinski and Greg J. Beitel	
This review highlights recent work showing transport-independent and transport-dependent functions of ion transporters, and in particular the Na-K-ATPase, in cell junction formation and tubulogenesis.	

On the cover: Defective placental vascular remodeling in preeclampsia. See Wang, Rana, and Ananth Karumanchi, p. 147.
