

## Editorial Board

An international journal of physiology produced jointly by the International Union of Physiological Sciences and the American Physiological Society

**Chief Editor** Walter Boron, New Haven, CT

**Associate Editors** Michael Caplan, New Haven, CT  
Ulrich Pohl, Munchen, Germany

**Special Advisor** Gerhard Giebisch, New Haven, CT

### Consulting Editors

Richard Aldrich, Stanford, CA  
David Clapham, Boston, MA  
Reiko Fitzsimonds, New Haven, CT  
Sten Grillner, Stockholm, Sweden  
Susan Hamilton, Houston, TX  
Donald Hilgemann, Dallas, TX  
Reinhard Jahn, Göttingen, Germany  
Baruch Kanner, Jerusalem, Israel  
Amira Klip, Toronto, Canada  
Jennifer Lippincott-Schwartz, Bethesda, MD  
José Lopez-Barneo, Seville, Spain  
Peter Meier-Abt, Zurich, Switzerland  
Heini Murer, Zurich, Switzerland  
Tullio Pozzan, Padua, Italy  
William Sessa, New Haven, CT  
Curt Sigmund, Iowa City, IA  
Michael Welsh, Iowa City, IA

### Editorial Coordinator

Charleen M Bertolini

### APS Publications Office

M. Reich, Director of Publications  
J. Darago, Journal Copy Editor

### Art Direction, J/B Woolsey Associates LLC

Patrick Lane, Design  
John D. Woolsey, Art Development/Editing  
Kelly Paralis, Illustration  
Wade Neumeister, Illustration

### IUPS/APS Joint Managing Board

Dale J. Benos, Chair  
Akimichi Kaneko  
Ewa Szczepanska-Sadowska  
Jimmy D. Neill, IUPS Treasurer

*Physiology* (ISSN 1548-9213, formerly 0886-1714; ESN 1548-9221, formerly 1522-161X) is published bimonthly (one volume per year) by the International Union of Physiological Sciences and the American Physiological Society. Subscription Price (U.S. dollars): Institutional print only, \$190 U.S., \$195 Canada and Mexico, \$200 elsewhere; institutional print and online, \$205 U.S., \$210 Canada and Mexico, \$215 elsewhere; institutional online only, \$165; nonmember individual print only, \$130 U.S., \$135 Canada and Mexico, \$140 elsewhere; nonmember individual print and online, \$145 U.S., \$150 Canada and Mexico, \$155 elsewhere; nonmember individual online only, \$110; members of IUPS-affiliated societies print and online, \$50.00, postpaid. Subscriptions are accepted on a calendar year basis only. Single Copies, Back Issues: when available \$35.00 each, postpaid. Copyright © 2004 by the International Union of Physiological Sciences and the American Physiological Society. Printed in the United States of America. The code at the bottom of the first page of an article indicates copyright owner's consent that copies may be made beyond that permitted by sections 107 and 108 of the U.S. Copyright Law—unless the copies are for general distribution, advertising, creating new works, or resale—provided the per-copy fee is paid through the Copyright Clearance Center, Inc., 222 Rosewood Dr., Danvers, MA 01923. 1548-9213/04 \$5.00. Change of Address: The journal must be advised of a change of address at least 6 weeks before date of issue, with both the subscriber's new and old addresses given. Undelivered copies resulting from an address change will not be replaced. Editorial Inquiries: Walter F. Boron, Chief Editor, *Physiology*, c/o Charleen Bertolini, Department of Cellular and Molecular Physiology, School of Medicine, 333 Cedar St., P. O. Box 208026, New Haven, CT 06520-8026. Subscription and Advertising Inquiries: *News in Physiological Sciences*, American Physiological Society, 9650 Rockville Pike, Bethesda, MD 20814-3991.

# PHYSIOLOGY

Volume 19, August 2004

**Editorial** 160  
*The New Physiology*

**Highlights from the Literature** 161

**Emerging Technologies** 168

**Robia G. Pautler**  
**Mouse MRI: Concepts and Applications in Physiology**

This review provides an introduction to basic magnetic resonance imaging concepts and their applications in murine model systems relevant to biomedical research.

## REVIEWS

**Hydroxylation of HIF-1: Oxygen Sensing** 176

**at the Molecular Level**

**Gregg L. Semenza**

O<sub>2</sub>-dependent hydroxylation of hypoxia-inducible factor-1 $\alpha$  represents a molecular basis for transcription responses to reduced O<sub>2</sub> availability.

**Unraveling the Cellular Mechanism of** 183

**Insulin Resistance in Humans: New Insights**

**from Magnetic Resonance Spectroscopy**

**Gerald I. Shulman**

Some paradigm-shifting results on the pathogenesis of type 2 diabetes have been obtained by magnetic resonance spectroscopy.

**Modeling the Heart** 191

**Denis Noble**

Insights into basic physiological mechanisms obtained through modeling the heart have been applied to understanding disease states.

**Why Trypanosomes Cause Sleeping Sickness** 198

**Gabriella B. Lundkvist, Krister Kristensson, and Marina Bentivoglio**

African trypanosomes induce alterations in hypothalamic sleep-regulatory and circadian-timing systems to cause a fragmented sleep and wakefulness pattern.

**The pH of the Secretory Pathway: Measurement,** 207

**Determinants, and Regulation**

**Paul Paroutis, Nicolas Touret, and Sergio Grinstein**

Luminal acidification of the secretory pathway is critical for its function. The determinants and regulation of the pH of secretory organelles are discussed.

**The ABCs of Immunology: Structure and Function** 216

**of TAP, the Transporter Associated with**

**Antigen Processing**

**Rupert Abele and Robert Tampé**

The ABC transporter TAP is an essential factor within the cellular immune system.

**Cystic Kidney Diseases: All Roads Lead to the Cilium** 225

**Qihong Zhang, Patrick D. Taulman, and Bradley K. Yoder**

Many of the proteins associated with cystic kidney diseases localize to the primary cilium. The pathogenesis of such cystic kidney disorders is discussed.

**On the cover:** Immunofluorescence staining of a mouse kidney tissue section by using antibodies against mouse polaris (red) and  $\beta$ -tubulin (green). Cilia extending into the lumen are detected on the epithelial cells lining the tubule. Nuclei are stained blue. See Zhang et al., p. 225.
