Title:

A Signature Below Certifies Compliance with the Following Statements

Copyright Transfer. In consideration of the acceptance of the above work for publication, I do hereby assign and transfer to the American Physiological Society (APS) all rights, title, and interest in and to the copyright in the above-titled work. This includes preliminary display/posting of the abstract of the accepted article in electronic form before publication. In cases in which obtaining a signature from each author would delay review, the corresponding author’s signature is sufficient provided that the corresponding author understands that he or she signs on behalf of all of the authors who have not signed the form. It should also be understood by all authors that the corresponding author has signed the manuscript submission form as their proxy. If any changes in authorship (order, deletions, or additions) occur after the manuscript is submitted, agreement by all authors for such changes must be on file with APS. An author’s name may only be removed at his/her own request. For commercial companies, authorized agent signatures are allowed for copyright transfer, but the corresponding author must sign for authorship responsibilities as stated below. Material prepared by employees of the US Government in the course of their official duties cannot be copyrighted.

Authorship Responsibilities. I attest that:
1) the manuscript is not currently under consideration, in press or published elsewhere, and the research reported will not be submitted for publication elsewhere until a final decision has been made as to its acceptability by the journal (posting of submitted material on a web site may be considered prior publication—note this in your cover letter);
2) the manuscript is truthful original work without fabrication, fraud, or plagiarism;
3) I have made an important scientific contribution to the study and am thoroughly familiar with the primary data; and
4) I have read the complete manuscript and take responsibility for the content and completeness of the manuscript and understand that I share responsibility if the paper, or part of the paper, is found to be faulty or fraudulent.

Conflict of Interest Disclosure. All funding sources supporting the work and all institutional or corporate affiliations of mine are acknowledged. Except as disclosed on a separate attachment, I certify that I have no commercial associations (e.g., consultancies, stock ownership, equity interests, patent-licensing arrangements) that might pose a conflict of interest in connection with the submitted article, and that I accept full responsibility for the conduct of the trial, had full access to all the data, and controlled the decision to publish.

☐ I have a potential conflict to disclose and will provide the form from http://www.the-aps.org/publications/journals/conflict.pdf.

☐ Please check if this article was written as part of the official duties of an employee of the US Government.

Commercial company agent’s signature (if applicable):

Authors should sign in the same order as on the manuscript title page (fax signatures, multiple forms acceptable). For more than 6 authors, use an extra sheet.

IITC’s Electronic von Frey has become the standard for pain and sensory measurement! *Often duplicated*, only the IITC EVF measures and records pain and sensory thresholds accurately.

IITC Inc. also offers the most extensive line of the following:

**Analgesia Meters**
- Hot Plate
- Incremental Hot/Cold Plate
- Incapacitance Test
- Tail Flick (TF)
- Plantar
- Tail/Plantar Combination Unit
- Digital Randall Selitto
- Paw Odema Meter
- Rota-Rod
- Treadmill

**Non-Invasive Blood Pressure**
- Mouse/Rat all other animals
- Single to 24 animal systems
- Low temperature, no stress
- Accurate and repeatable data
- Validated to telemetry
- Lifetime Warranty
