The American Physiological Society (APS) brings to its readership Articles in Press. In partnership with HighWire Press, we publish online—within only days after their acceptance—peer-reviewed papers submitted to our prestigious research journals. Articles in Press dramatically reduce time to publication, accomplishing an important goal of The American Physiological Society of providing researchers all over the world with instant, subscription-based access to the newest research.

APS Articles in Press are citable, searchable in PubMed, and will establish publication priority. These articles are original, unedited, accepted version, as submitted by the author.

Once a paper is published online as an Article in Press, it proceeds through the established course of thorough copyediting and production, leading to its publication (about 9 weeks later) in the final online and print editions of the appropriate APS Journal. This final version will bear the date, volume, and page numbers as well as the Articles in Press publication date and identifier, called the DOI.

After the journal issue is published online and in print, the final version of the paper will come up on search while the Articles in Press version will be stored in an accessible, permanent archive.

We hope that this important service to our authors and readers will meet their expectations. View the APS Articles in Press pages at the journal home pages: ajpcan.org, ajpcell.org, ajpendo.org, ajporgi.org, ajpreheart.org, ajplung.org, ajpregu.org, ajprenal.org, jap.org, jn.org, and physiolgenomics.org.

IITC’s Electronic von Frey
has become the standard for pain and sensory measurement!
*Often duplicated*, only the IITC EVF measures and records
tax thresholds accurately.

IITC Inc. also offers the most extensive line of the following:

**Analgesia Meters**
- Hot Plate
- Incremental Hot/Cold Plate
- Incapacitance Test
- Tail Flick (TF)
- Plantar
- Tail/Plantar Combination Unit
- Digital Randall Selitto
- Paw Odema Meter
- Rota-Rod
- Treadmill

**Non-Invasive Blood Pressure**
- Mouse/Rat all other animals
- Single to 24 animal systems
- Low temperature, no stress
- Accurate and repeatable data
- Validated to telemetry
- Lifetime Warranty

One Leader...
...One Choice.

IITC Inc. Life Science
23924 Victory Blvd, Woodland Hills, CA 91367 - 318-710-8843

Faster Results With Automated Analysis & Scoring Tools
Save Time and Standardize Results

- AcqKnowledge® 4 includes over 100 new features
- Analysis routines for ECG, BP, LVP, Monophasic Action Potentials, Impedance Cardiography, EEG Artifact Removal (ECG extraction), Gastric Wave Analysis...plus multi-channel event marking system, enhanced cycle/peak/event detection, 3D plotting, file format options, and more
- Complete solutions for research and education

Speed up with AcqKnowledge® 4...request your free demo CD!

Data Acquisition and Analysis Systems

New lab solutions include...
- MP36R 4-channel universal amp with AcqKnowledge 4.1
- NIBP - finger cuff or animal tail
- Wearable physiology data logger & telemetry system
