This review examines the role of H₂S in evolution and the evolution of H₂S metabolism in metabolism and signaling.

Kenneth R. Olson and Karl D. Straub
This review examines the role of H₂S in evolution and the evolution of H₂S metabolism and signaling.

Steve Harrell,, and Ciro Indolfi
This review addresses the functional role played by exosomal miRNAs in heart disease and their potential use as new biomarkers.

R. Ariel Gomez and Maria Luisa S. Sequeira-Lopez
This review discusses the origin, fate, and novel roles of renin cell precursors.

Claudio Iaconetti, Sabato Sorrentino, Salvatore De Rosa, and Ciro Indolfi
This review discusses the functional role played by exosomal miRNAs in heart disease and their potential use as new biomarkers.

The Chemistry of Cold: Mechanisms of Torpor Regulation in the Siberian Hamster
